

Industrial Machine Log Integrity Checker

Industrial Machine Log Integrity Checker

Real-Time Telemetry Verification using Handwritten Modulo-2 Polynomial Division (CRC-32)

Core Engineering

- Handwritten Modulo-2 XOR Division without black-box libraries (no zlib).
- Session-Fixed 33-bit Generator Polynomial Invariant.

Observability Cockpit

- Dual-Panel AEGIS-styled telemetry dashboard with live process steps.
- 1-click bit-mutation simulation for real-time error demonstration.
